## 1. INTRODUCTION

The Public Procurement Act No. 8 of 2020 (PPA), was enacted to revise the law relating to procurement so as to enhance transparency, efficiency, effectiveness, economy, value for money, competition and accountability in public procurement; regulate and control practices relating to public procurement.

In accordance with Section 12 (3) of the PPA, the Authority is required to issue a quarterly Market Price Index (MPI) to be used by a controlling officer, chief executive officer and procuring entity for purposes of an informed price decision. Further, Section 12 (2) of the PPA provides that a procuring entity shall procure standard goods, services and works in accordance with the price index issued by the Authority. Additionally, procuring entities will use the MPI as a tool for budgeting, annual procurement planning, and bid/tender evaluation.

The Authority is hereby issuing the quarterly Market Price Index (MPI) which is intended to be made available to all stakeholders involved in the public procurement process and supply chain for purposes of making informed price decisions during their respective tendering and supply processes.

## 2. METHODOLOGY

The Authority has collaborated with Zambia Statistics Agency (ZamStats) (the institution responsible for the coordination of production and publication of official statistics in Zambia, in accordance with the Statistics Act No. 13 of 2018) in the data collection, analysis and production of this MPI.

### 2.1 Data Analysis

The data processing phases included data entry, cleaning and analysis. The following variables were computed and employed during the data processing phases: namely, geometric mean, standard deviation, coefficient of variation and the count (i.e. number of quotations per item). The maximum and minimum prices for each item were also computed by province and at national level.

The variables used in the MPI report are as explained below:

**The Geometric mean** of prices was calculated by getting the product of their values and taking the  $n^{\text{th}}$  root of the product (as opposed to the arithmetic mean which uses the sum of their values divided by  $n$ ) where  $n$  refers to the number of observations. The geometric mean represents the average price and was calculated for each item in each province from a minimum number of six price quotations. The 'National Average' price was also derived by calculating the geometric mean from the provincial average prices on each item.

**The standard deviation** is a measure of dispersion and was calculated to show how far data sets deviate from the group geometric mean.

**The Coefficient of Variation (CV)**, is a measure of spread that describes the amount of variability relative to the mean and is calculated by dividing the standard deviation by the geometric mean and multiplying by 100.

**The Count 'N'** is the number of valid prices which is used to calculate the geometric mean.

## 2.2 Product Classification

The United Nations Standard Products and Services Code (UNSPSC)' international coding system was used to code all the items. The UNSPSC coding system enables buyers and sellers to describe goods and services in a common way without referring to any suppliers' in-house catalogue codes and descriptions. The UNSPSC framework adopts a four or five level classification, using the labels Segment, Family, Class, Commodity and Business Function. The Index further includes a general summary of items under the Consumer Price Index (CPI) which are in conformity to the Classification of Individual Consumption by Purpose (COICOP) coding system, as adopted from ZamStats.

This index has a total number of 2,282 items (939 items under the UNSPSC, 1,120 medical supplies and equipment items and 223 under the COICOP system).

## 2.3 Currency of MPI

The prices of the items collected are presented in **Zambian Kwacha**, unless otherwise explicitly stated in the index. The exchange and inflation rates prevailing at the time of price collection were taken into consideration during the preparation of the MPI and CPI.

## 2.4 Limitations in the MPI

- (i) The COVID 19 pandemic delayed the accessibility to information as some outlets were not accessible during the time of the survey. In some instances, it was not possible to obtain the average prices from the recommended number of at least six (6) price quotations per item which led to dropping the price for that particular item from the MPI.
- (ii) Further, for procurement of 'Works', the various civil works procured by procuring entities have not been presented in this MPI. However, for subsequent MPIs the Authority is acquiring a cost estimator software that will enable it to come up with buildup rates for various standard works in the construction industry.

### 3. APPLICATION OF THE MARKET PRICE INDEX

Procuring entities are advised to refer to the Average Prices from their respective provinces. However, where the price(s) for a particular item(s) are not provided for in the respective province, the National Average Prices may be used. Procuring entities are required **to ensure** that the range of prices for goods, works or services are **plus or minus ten percent (±10%)** of the prices in the Index. The MPI shall be used during the following stages:

- (a) Budgeting;
- (b) Annual Procurement Planning; or
- (c) Bid/Tender Evaluation.

Prices for goods works or services that have been set by the respective government Institutions shall be considered as the prices to be used for benchmark purposes and as part of the MPI. These include among others, fuel prices as set by the Energy Regulation Board; guidance on minimum insurance rates as set by Pensions and Insurance Authority; rates and prices set by Utility Companies; etc.

The brand names included in the price index were mentioned as emphasis for most commonly procured goods and services in the public sector. Therefore, the stated brand names are not an exclusive recommendation or prescription by the Authority to procuring entities, but are merely mentioned for purposes of additional information in the market place.

Procuring entities are reminded to undertake price reasonableness analysis (subject to approval by the Authority) where an item to be procured is not covered in the quarterly MPI.

All procuring entities are reminded of the provisions of section 12 (5) of the PPA which provides that ***'...An office holder who willfully or negligently engages or is involved in a transaction in which standard goods, services and works are procured at an inflated price commits an offence...'***

The Authority shall continuously review and update the MPI to ensure that goods, works or services that are commonly procured by procuring entities are covered in the subsequent MPIs. Procuring entities are requested to share soft copies, to [RCD@zppa.org.zm](mailto:RCD@zppa.org.zm), in Microsoft Word or Microsoft Excel of commonly procured items not covered in the Market Price Index, for ease of compilation by the Authority. The specifications for the items should be comprehensive and unambiguous.

#### 3.1 Validity of the MPI

The MPI shall be valid for a period of three (3) months and will be in effect until the Authority issues the next quarterly index.

## 4. SURVEY RESULTS

### CATEGORY A: GOODS

**Notes**

The dash (-) wherever it appears in the table in place of the real price means the price missing due to either one of the following reasons:

1. Number of quotations collected were less than 3 to determine an objective average price;
2. Product was unavailable at the time of data collection;
3. Outlets were not found/outlets were not accessible at the time of data collection.

**Notes**

The dash (-) wherever it appears in the table in place of the real price means the price missing due to either one of the following reasons:

1. Number of quotations collected were less than 3 to determine an objective average price
2. Product was unavailable at the time of data collection
3. Outlets were not found/outlets were not accessible at the time of data collection

### Notes

The dash (-) wherever it appears in the table in place of the real price means the price missing due to either one of the following reasons:

1. Number of quotations collected were less than 3 to determine an objective average price
2. Product was unavailable at the time of data collection
3. Outlets were not found/outlets were not accessible at the time of data collection

### Notes

The dash (-) wherever it appears in the table in place of the real price means the price missing due to either one of the following reasons:

1. Number of quotations collected were less than 3 to determine an objective average price
2. Product was unavailable at the time of data collection
3. Outlets were not found/outlets were not accessible at the time of data collection

## CATEGORY C: WORKS

\*There shall be a cost estimator that will enable the Authority to come up with buildup rates in the construction industry (Net-Cost Estimator) for subsequent MPIs

**Table 25: Drilling of Borehole**

Item Code	Item Description	Unit	Qty	Lusaka	Southern	Luapula	Northern	Muchinga	Central	Eastern	Western	NW	CB	National Average
7112160801	Mobilization / Demobilization - Borehole drilling Borehole lining and installation; Well development Civil Works and Installation of handpumps - Supply and installation of India Mark II handpump Hand pump and Set of Tools and Manuals	ITE M	1	23,163.68	27,675.27	32,698.51	40,128.00	35,438.30	24,084.00	32,518.56	34,153.67	-	-	30,740.13

*Note*

The price for drilling is dependent on the respective location and geographical features of a given area.

## CATEGORY D: INTERNATIONAL TRADE MPIS

**Note:** Once the International MPIS for Goods, services and works have been collected and compiled, they will be disseminated for use by Pes. This shall be done in conjunction with the Zambia Revenue Authority and ZamStats.

## CATEGORY E: GENERAL SUMMARY

This section, general summary, comprises of items with prices as collected by ZamStats for purposes of the Consumer Price Index (CPI). For purposes of the MPI, the average national prices presented may be used to provide informed price decisions. The products are coded in conformity to the Classification of Individual Consumption by Purpose (COICOP) system. Additional products as indicated in the CPI may be accessed from the ZamStats website (<https://www.zamstats.gov.zm/>). The average prices in this section are as collected from the different provinces as in the first quarter of 2022.

**Note:** The Authority is cognizant that the items in the CPI using the COICOP system may have additional items from those in the MPI and are equally commonly procured by procuring entities. Procuring entities shall use the table below for price benchmarking purposes.

**Table 26: Summary for All Products using Classification of Individual Consumption by Purpose (COICOP) Coding System**

Item Code	Item Description	UoM		Price
011111	Breakfast Mealie Meal	25	Kilogram	148.01
